

Unreal Engine 4 Graphical Glitches in WINE: Troubleshooting Texture Issues and More

Unreal Engine 4 (UE4) is a popular game engine known for its high-fidelity graphics and versatile development tools. However, when running UE4 games or the editor itself within a Wine environment (a compatibility layer for running Windows applications on other operating systems like Linux), users may encounter various graphical glitches. A common issue reported is textures appearing as white or overly exposed ([Tripo3D.ai](#)). This can stem from problems related to texture import settings, incorrect linking of texture files, or issues with the FBX file itself ([Tripo3D.ai](#)).

Beyond white textures, other graphical anomalies can also arise when using Wine with UE4, particularly on systems with AMD GPUs. These may include random graphical glitches with brightly colored polygons, flickering editor windows, and problems with sRGB and washed-out textures ([manerosss.wordpress.com](#)). Reports from as far back as 2014 indicate specific issues with NVIDIA drivers related to Anisotropic Filtering override and Texture Sharpening settings, leading to red artifacts and other visual distortions in UE3 engine games when running natively on Linux ([NVIDIA Developer Forums](#)). Moreover, the performance can be heavily affected by CPU-related factors, such as the presence of AVX2 instruction sets or TSC clocksource issues, especially when DXVK (a Vulkan-based translation layer for Direct3D 9/10/11) is involved ([Level1Techs Forums](#)). This report aims to provide a comprehensive guide, drawing from community discussions and troubleshooting experiences, to resolve these UE4 graphical glitches within the Wine environment, ensuring a smoother development and gaming experience as of June 16, 2025.

Table of Contents

Please provide the Research Report so I can accurately write a conclusion that summarizes its findings regarding fixing UE4 graphical glitches (white

textures) in WINE. I need the content of the report to be able to create a relevant and useful conclusion with proper citations.
