

Troubleshooting Graphical Glitches in Unreal Engine 4 (UE4) within WINE Environments

Unreal Engine 4 (UE4) is a popular game engine used for developing a wide variety of games. However, users may encounter graphical glitches when running games built with UE4 within a WINE environment (Wine is a compatibility layer for running Windows applications on Unix-like operating systems). One common problem is textures appearing as white, rendering portions of the game world incorrectly ([anonymoususer326e25c8, 2015](#)). This report aims to address these issues, providing potential causes and solutions for fixing UE4 graphical glitches in WINE.

Several factors can contribute to these graphical anomalies. Issues can stem from missing or incorrect MSVC runtimes needed for the UE games ([Snowhill, 2021](#)), geometry shader problems, OpenGL issues ([sandipt, 2014](#)), or driver incompatibility ([a_jax, 2018](#)). Configuration issues within the Unreal.ini file such as incorrect graphics renderer or performance settings can also be the cause for the texture errors ([Waterkonijn, 2022](#)). The solutions can vary, from installing the correct MSVC runtimes to making changes to the Unreal.INI configuration file to improve performance or enabling or disabling graphic settings from the Nvidia Xserver settings ([r2rX, 2014](#)).

The BRAWL² Tournament Challenge, was announced May 12, scheduled to end Sept 12 a year ago is not considered as new issue ([Polycount, 2023](#)). Newer issues are taken as significant and the report will explore the mentioned factors and possible solutions to mitigate glitches and ensure a better gaming experience for all Unreal games within the Wine environment.

Table of Contents

Please provide the Research Report so I can write a comprehensive conclusion. I need the content of the report to accurately address the research task and write a relevant and informative conclusion. Once you provide the

report, I will deliver the conclusion formatted as requested, including in-text citations with markdown hyperlinks.
